

Real Crimes. Real Children.

Become a funding partner and join us in the fight against Child Sexual Abuse and Exploitation online.

INHOPE

We cannot tolerate the sexual exploitation and abuse of children being produced, distributed and consumed.

This is more than a digital crime, it is an unspeakable crime and physical act that happens to real children.

Cases of child sexual abuse material (CSAM) are often treated less seriously than cases of child sexual abuse, even though CSAM is the recorded evidence of that crime. CSAM perpetuates re-victimisation through the ongoing trauma caused by its distribution. By removing CSAM online we enable a cleaner internet and therefore safer digital environment for everyone: a safer place for children, and digital citizens - which include us, you, our families, and our colleagues.

INHOPE

Determine if your organisation should become a funding partner.

Does your organisation align with INHOPE 's vision of a world free of Child Sexual Abuse Material online?

If yes, then consider becoming a partner. We will make sure that everyone not only has the right but also the ability to report CSAM.

Does your organisation have a Trusted Flagger Programme or are you currently exploring the development of one?

If yes, then consider becoming a partner. We integrate INHOPE members into your Trusted Flagger Programme to ensure a safe and secure user experience.

Does your organisation have a dedicated Trust and Safety team to ensure CSAM is not on your platforms?

If yes, then consider becoming a partner. Let's disrupt bad actors with technology.

Is your organisation proactively looking for a way to participate in the removal of CSAM online?

If yes, then consider becoming a partner. INHOPE member hotlines rapidly remove CSAM online.

INHOPE

INHOPE

How funding translates into action.

By becoming a funding partner you actively contribute to:

- Establishing new hotlines, specifically in high-risk countries for the hosting and/or production of CSAM.
- Creating awareness in regions that do not know or believe CSAM exists.
- Supporting regional and global advocacy for necessary legislative change.
- Providing mental health support and well-being to over 240 content analysts.
- Developing INHOPE's internal technology platform ICCAM: used for the secure exchange, collection, classification and removal of CSAM reports.
